

## EVERLOC® Fitting System

The Original Keeps Getting Better

**In 1985 REHAU pioneered  
compression sleeve fittings. Over  
the last three decades, more than  
100 million EVERLOC fittings  
have been installed around the  
world.**

The EVERLOC fitting system is available in couplings, tees, elbows, straight adapters and valves. In fact, we've just added more than 30 new fittings. EVERLOC is available in a wide range of sizes—3/8" to 2", and in metric up to 160 mm. The large diameter fittings work with RAUPEX pipe for large residential and commercial applications.

REHAU's EVERLOC fittings are produced from solid brass, and make a fast, easy connection in virtually any conditions.

We are so confident in both our RAUPEX pipe and EVERLOC fitting system that we offer a 25-year limited warranty.

All EVERLOC fittings are fully certified to U.S. and Canadian standards, including ASTM F 2080.

Other fitting systems are not able to match the proven history of REHAU's compression sleeve fittings.

## PEX Plumbing Systems

More and more plumbers are switching to our PEX Plumbing System as their system of choice; it's easy to install, offering freedom of design and installation.

## We Pioneered PEX

In 1968, REHAU pioneered PEX pipe with the production of the first PEXa (high-pressure peroxide PEX).

RAUPEX plumbing pipe is available in red, white and blue for easy identification on the job site. RAUPEX O<sub>2</sub> Barrier pipe has a red oxygen diffusion barrier for radiant heating applications. RAUPEX pipes are now produced in REHAU's ISO 9001-certified facility in the United States

## Fire Protection

REHAU's residential fire protection system improves a homeowners protection against injury, loss of life, and property damage. REHAU is the first manufacturer to become UL and C-UL Listed for NFPA 13D fire sprinkler applications, based on 3/4" and 1" pipes and fittings.

## Service Line Pipe

MUNICIPEX® service line pipes deliver greater service life while retaining maximum flow. Available in sizes 3/4" to 2", and in a distinctive blue color for UV protection and identification.

## Radiant Heating

The RAUPANEL™ radiant heating system is designed to provide rapid response, optimal performance, and ease of installation. This patented low profile system is an excellent alternative to joist heating and poured thermal mass applications.

## Energy Transfer Pipe

INSULPEX® pre-insulated PEX pipe is specially designed for the efficient transfer of hot or chilled water through buried pipelines. A flexible alternative, INSULPEX is available in continuous coils of various lengths.

## Snow and Ice Melting

Designed to facilitate the removal of snow and ice on any surface, public or private, residential or commercial.
